Do you have a minor surgery area within your primary care/GP practice?
Do you work in the minor surgery setting?
Do you manage a minor surgery environment?
Are you responsible for minor surgical procedures?

Then you need:

Standards and Recommendations for Surgery in Primary Care

This NEW publication from the Association for Perioperative Practice (AfPP) will provide comprehensive guidance and standards for minimising the risk to patients and personnel in the minor surgery area. With a foreword written by David Colin-Thomé, National Director of Primary Care, Department of Health, a host of topics are covered including:

- Practice-based commissioning
- The minor surgery environment
- Infection control
- Surgical instruments and their management
- Risk management
- Legal and ethical issues
- Patient care pathway
- Principles of anaesthetics
- Correct site surgery
- and much more...

Price includes postage/packing to a UK address.
