Quality of operation notes in orthopaedic hip arthroplasty surgery: are we complying with British Orthopaedic Association’s guide to good practice?
This retrospective audit by CU Menakaya, H Ingoe, R Malhotra, M Shah, T Boddice and A Mohsen evaluates the compliance of our operation notes with the British Orthopaedic Society Primary Hip Arthroplasty ‘A guide to good practice’ using a 24-data point question (BOA 2006).

277 CLINICAL FEATURE
Evaluative survey-questionnaire exploring the perceptions and experiences of endoscopy and sterile service staff
The aim of this evaluative survey-questionnaire by A Cobbold was to explore the attitudes and experiences of endoscopy and sterile service staff in their current job roles and to identify any perceived barriers during the proposed transition to professionalization. The article concludes by highlighting the positive and negative aspects of current job roles in relation to job satisfaction, staff retention and career progression opportunities

283 OPEN LEARNING ZONE
Preceptorship: professional development and support for newly registered practitioners
This open learning zone article by C McCusker outlines the various aspects of preceptorship for nurses, midwives and specialist community public health nurses in Northern Ireland. It is hoped that the elements within it have transferability across other healthcare professions. The article will help the reader understand where preceptorship fits within a professional development and support continuum

288 CLINICAL FEATURE
Increasing compliance with the World Health Organisation’s Surgical Safety Checklist
The World Health Organisation Surgical Safety Checklist is a validated tool for reducing in-patient surgical morbidity and mortality. It is not performed universally with full compliance. Two audit cycles were completed at two different trauma and orthopaedic units and compliance was measured. The authors, WKM Kieffer, MC Quaye, N Chotai and DM Ricketts, recommend regular audit of compliance and change in practice for all surgical units, and suggest national monitoring to ensure the benefits of the WHO checklist are applied to all in-patient surgery

292 CLINICAL FEATURE
Do current methods for endotracheal tube cuff inflation create pressures above the recommended range? A review of the evidence
In this article Thomas Grant will seek to examine if intraoperative cuff assessment and monitoring should become routine for the anaesthetic practitioner and if current practice for inflating cuffs creates pressures outside the safe range

296 THE NAME BEHIND THE DISEASE
John Langdon Down: Down’s syndrome
Every day we use the eponymous names of many diseases and injuries, but how many of you know much about the person behind the name? Professor Harold Ellis continues this series with John Langdon Down. Although we include John Langdon Down in this series we acknowledge that Down’s syndrome is not a disease but a condition.
